

Summarised Friday Sermon

08 MAY 2009

PREVENTION IS BETTER THAN CURE

- For a few weeks now, we have heard of the outbreak of the H1N1 flu virus globally. This virus has spread to a number of countries. It continues to spread and the virus can cause death if it is not treated.
- Therefore, before the danger comes to us, we must take precautions to safeguard ourselves and the public.
- The first step is cleanliness. For this also, Islam makes cleanliness as part of our Iman (Faith).
- The second step is to work towards good health for our bodies. It is our duty to take good care of our body.
- Another important step is to maintain public health. This is indeed one of our social responsibilities as a good Muslim.
- When we hold on strongly to Islam and its beautiful teachings, InshaAllah, we will be able to become good examples and bring blessings to all Ameen.
