

Summarised Friday Sermon

23 MAY 2008

A POSITIVE MIND AS A CATALYST FOR PROGRESSIVENESS

- We must try to appreciate the high status and value of knowledge by always learning and upgrading ourselves. A wise saying goes “Seek knowledge from cradle to grave.”
- Apart from our desire to learn, we should also maximise the use of our thinking faculty or mind as part of being a prosperous and progressive community. By doing so, we will continue to develop ourselves and benefit others.
- We must use our thinking faculty or mind in the best manner. We should not limit nor restrict its use. We should not use our minds narrowly despite contemporary challenges and modern life requiring us to think widely.
- If we do not use this gift of Allah s.w.t in the best manner, we will not be able to progress in life. Because then, our minds will only think of fulfilling desires, to eat, drink, seek entertainment and opulence.
- Let's always challenge our minds, stretch it, and use this great gift of Allah s.w.t. in the way it deserves. May Allah s.w.t. help us in this efforts and may He grant us success and His guidance always Amin.
