30 MAY 2008

OVERCOMING THE ECONOMIC CHALLENGE OF INFLATION

- Life in this world is not without its challenges. This is how Allah s.w.t. has determined for His creations through His Sunnah, to test and enhance their iman and resilience.
- Of late, there has been price hikes in many items which we use daily. We are certainly affected to some extent by these price increases. Thus, we must manage our expenditure carefully, so as to be able to face and overcome the challenge of inflation with confidence and success.
- Therefore, my dear brothers, today we will share with you some guide on how to deal with inflation and price hikes. First is to be moderate in our expenditure. We all need to spend and we want to spend, whether for our basic necessities, or beyond our basic needs.
- The next thing we need to do is to save adequately. Our savings will be useful especially if prices continue to increase, and we may not have enough cash from our salaries to pay for expenses. In times of great difficulties, our savings will come in handy.
- When we are moderate in our expenditure, when we plan things well, and we help those in need, Insha Allah, we will be able to fortify further the economic resilience of our community.
